ABOUT ME

Data Scientist and aspiring Machine Learning Engineer with expertise in data analytics, statistical modeling, and AI systems development. Developed data-driven solutions with a focus on fairness and user-centered design. Experience in machine learning, deep learning, and data engineering, aiming to leverage skills in applied AI and product development to drive innovation.

TECHNICAL SKILLS

- **Programming Languages:** Python, R, SQL, HTML, CSS
- **Cloud & Big Data Tools:** AWS (S3, SageMaker, Lambda, EC2), JSON, Docker (basic)
- **Machine Learning & Data Science:** Supervised & Unsupervised Learning, Statistical Modeling, Feature Engineering, A/B Testing, EDA
- **Data Visualization & Business Intelligence:** Tableau, Pandas, Matplotlib, Seaborn, Plotly
- **Deep Learning & AI:** Neural Networks, CNNs Transfer Learning, Computer Vision, NLP
- **Tools & Frameworks:** Scikit-Learn, TensorFlow, Keras, PyTorch, OpenCV, NLTK, Gensim, spaCy

PROJECTS

Smart Sickle Cell Diary App (Capstone)

- Built an interactive diary app to support patients with Sickle Cell Disease using NLP and classification models.
- Designed a Streamlit interface for symptom logging, trend visualization, and trigger detection.
- Built ML models to predict pain and emotion levels; emphasized ethical AI, user agency, and fairness.
- Tools: Streamlit, Scikit-Learn, TextBlob, Plotly, Python, Joblib

Sentiment Analysis of Customer Reviews

- Built and evaluated sentiment classifiers using Word2Vec, Glove, and Sentence Transformers.
- Fine-tuned a transformer from Hugging Face to summarize reviews and extract impactful weekly events.
- Tools: Python, Scikit-Learn, Gensim, Hugging Face Transformers, Matplotlib, Pandas

Landmark Classification Project Using CNNs

- Improved model accuracy from 41% to 79% using ResNet50 with fine-tuning and image augmentation.
- Developed modular PyTorch training scripts and visualized training/validation metrics.
- Tools: PyTorch, OpenCV, Pillow, Livelossplot

Scones Unlimited - ML Workflow with AWS

- Designed a serverless ML pipeline for image classification using AWS SageMaker, Lambda, and S3.
- Deployed and monitored models with SageMaker Model Monitor to detect drift and performance issues.
- Tools: AWS (S3, SageMaker, Lambda), Boto3, Python

EXPERIENCE

Primrose School at Rancho Sienna, Georgetown TX

Oct 2020 - Feb 2025

Teacher Support

- Designed and delivered data-informed lesson plans, applying structured workflows analogous to data pipelines, which enhanced student engagement and learning outcomes
- Enhanced communication skills applicable to technical documentation and stakeholder alignment, leading to improved collaboration and understanding among team members
- Supported diverse learners, which provided insights into user-centered AI system design, resulting in more inclusive and effective educational tools

Mustard Seed Children Academy, Bentonville AR

Sep 2018 - Apr 2019

Teacher

- Analyzed student performance data to refine instruction, leading to improved student outcomes
- Developed collaboration and communication skills by leading group projects, enhancing teamwork abilities applicable to agile tech teams

Nigeria Cleaning Service Limited, Lagos Nigeria

May 2008 - Dec 2008

Accounts Clerk

- Maintained ledgers and processed invoices accurately, ensuring timely payments and reducing errors in financial records
- Enhanced billing cycles by implementing efficient data management practices, leading to faster processing times and improved documentation skills

EDUCATION

Eastern University, PA <i>Master of Science, Data Science</i> • Coursework: Data Manipulation, Data Science for Business, Data Analytics in R, Data and Database Management with SQL, Cloud Foundations, Fundamentals of Machine Learning Models, Applied Machine Learning, Natural Language Processing, Ethical and Philosophical Issues in Data Science, Applied Data Science & Analytics	Jul 2025
University Of Texas at Austin, TX <i>Postgraduate Certificate, AI/ML</i>	2024 - 2025
Obafemi Awolowo University, Ile-Ife, Nigeria <i>Bachelor of Arts, Music</i>	2011 - 2013
The Polytechnic Ibadan, Ibadan, Nigeria <i>Associate's Degree, Music Technology</i>	2009 - 2010

CERTIFICATIONS

- **Udacity Nanodegree Programs (2023 - 2024):** AWS Machine Learning Engineer | AI Programming with Python | ML Fundamentals
- **Codecademy (2022 - 2024):** ML/AI Engineer | NLP for Data Scientists | Machine Learning for Data Scientists

SCHOLARSHIPS

- **AWS & Udacity AI/ML Scholar (2023, 2024):** Selected among top applicants for hands-on, project-based learning in cloud ML deployment, deep learning, and AI automation.
